HeatSaver™ Box in D-type Box Format

The HeatSaver™ Box performs *superbly* in this D-type box format. It folds, stacks, closes, and handles *exactly the same* as the D-type box without the pizzalegs. Also, it possesses *every* feature and benefit cited for the square box version of the HeatSaver™ Box ... including *no higher price*. (Note: The box shown above is a version of the D-type box presently used by Domino's Pizza.)
